Wireless hygenic temperature sensor (Bluetooth) with smart App & online customer portal

AN ESSENTIAL TOOL FOR EVERYONE WHO MEASURES AND REGISTERS TEMPERATURE

Innovative solution: with a built-in temperature meter and an unique BLUETOOTH SENSOR you automatically register product measurements and store everything directly online in your own digital folder.

Controlling authorities: You can quickly and easily give access to data including the actions taken in the event of an emergency.

Efficient and easy to use: you insert the tip of the temperature sensor into the product and the stable temperature is automatically sent to your digital folder.

Wireless hygenic temperature sensor (Bluetooth) with smart App & online customer portal

EXAMPLE OF A REPORT

Wednesday 11 March 2020 - Wednesday 11 March 2020

company: demo
carried out by demo

measurements

location: Sniep 83
1112 AJ, Diemen

Product	Category	Sort	Date / time	Temp	Distribution time (min)	Shelf life	Actions taken
SOUP	Hot		11-03-2020 10:12	50,1°C	0	-	Too Cold, reheat to min. 65 degrees
MEAT	Cold		11-03-2020 10:19	4,1 °C	0	-	
FREEZER	frozen		11-03-2020 10:15	-10,5°C	0	-	Returned to supplier, Temperature too warm

Benefits of the wireless temperature sensor with app and online portal:

✓ HACCP policy: It allows you to manage your HACCP policy efficiently, user-friendly and responsibly.
✓ Cost effective: you save on paper, energy and time.
✓ Easily collect and share information: from a central location, you can follow the data from multiple locations and quickly share it with colleagues or controlling authorities.
✓ Monitors and supports employees: the app warns if a measurement is not being carried out and supports employees with measurements.
✓ Efficient and simple: in the app you can view the automatically stored online measurement data when and where you want.
✓ Provides insight into areas for improvement: measurement data can be easily compared and, where necessary, improved. The app analyzes measurement data.
✓ Quality and customer-friendly service: you choose experience, innovation and expertise.

When you choose for this concept of wireless temperature measurement and registration, you will receive the hygienic Bluetooth temperature sensor, access to the App and a customer-specific online portal.

Are you curious about the benefits of the wireless temperature sensor with app and online portal for your company? Our staff will gladly help you! Call the Langkamp Technology telephone number **+31(0)343-595410** or mail to: **info@ltbv.nl**
